Professional Summary

Detail-oriented and impact-driven Data Analyst & Data Engineer with 2+ years of experience building scalable ETL pipelines, developing Power BI dashboards, and integrating complex data systems. Adept in Python, SQL, and cloud tools with strong analytical and visualization skills. Proven track record of transforming raw data into actionable business insights to drive informed decisions.

Technical Skills

Languages & Tools: Python, SQL (PostgreSQL, MySQL, SQL Server), Power BI, Tableau, Google Data Studio, Looker

ETL & Data Tools: Apache Kafka, Airflow, SSIS, Shell Scripting, Navicat, SSMS

Data Engineering: Data Warehousing, Data Modeling, API Integration, Data Pipelines

Cloud & DevOps: GitHub, Docker , SAP Analytics Cloud

Other: PHP, Laravel, Flutter, Excel

Soft Skills: Problem-Solving, Communication, Time Management, Continuous Learning

Professional Experience

Kiat Ananda Group – Bekasi

Senior Data Analyst (Feb 2026 – Present)

- Developed automated ETL pipelines to integrate data from multiple APIs and databases, improving data availability by 40%.
- Created over 20+ interactive dashboards in Power BI used by business teams for real-time monitoring.
- Collaborated with stakeholders to design KPI tracking tools and deliver actionable insights.
- Implemented data validation frameworks to improve data quality and reduce reporting errors.
- Managed end-to-end data integration from ERP and external sources, ensuring clean, reliable data.
- Designed and maintained robust data pipelines to support business reporting.
- Delivered training sessions for internal staff on data visualization and dashboarding best practices.
- Collaborated with internal users to ensure the migrated reports met their requirements, improving report functionality and usability.
- Translated SQL data sources from Any Database into Power BI, ensuring accurate data modeling and smooth data integration for reporting.

PT Astra International Tbk – Jakarta

ETL / BI Developer(Aug 2025 – Jan 2026)

- Contributing to the Odysseus Project at Auto 2000, a large-scale initiative with 200+ team members, focusing on BI development and seamless data integration.
- Assigned to a migration project converting 12 MicroStrategy (MSTR) reports to Power BI within 2 months, working on end-to-end processes.
- Translated SQL data sources from MicroStrategy cube into Power BI, ensuring accurate data modeling and smooth data integration for reporting.
- Developed and refined visualizations, created necessary logic, and tailored reports to meet the specific needs of report owners and stakeholders.
- Collaborated with internal users to ensure the migrated reports met their requirements, improving report functionality and usability.
- Designed and maintained robust data pipelines to support business reporting.
- Delivered training sessions for internal staff on data visualization and dashboarding best practices.

PT Link Net Tbk – Tangerang

ETL / Data Analyst / BI Dveloper(Aug 2024 – Jul 2025)

- Developed automated ETL pipelines to integrate data from multiple APIs and databases, improving data availability by 40%.
- Created over 20+ interactive dashboards in Power BI used by business teams for real-time monitoring.
- Collaborated with stakeholders to design KPI tracking tools and deliver actionable insights.
- Implemented data validation frameworks to improve data quality and reduce reporting errors.
- Managed end-to-end data integration from ERP and external sources, ensuring clean, reliable data.
- Designed and maintained robust data pipelines to support business reporting.
- Delivered training sessions for internal staff on data visualization and dashboarding best practices.

Importir ORG – Tangerang

Data Engineer Intern / Management Trainee (Feb 2024 – May 2024)

- Conducted performance analysis on logistics and sales data in collaboration with backend team.
- Built ETL processes to extract and clean large datasets for use in reporting and forecasting.
- Supported QA and development team in identifying and resolving data anomalies.

Freelance (Remote)

Data Engineer / Data Analyst / ML Developer (Aug 2023 – Jan 2024)

- Built scalable pipelines for structured/unstructured data for 5+ small business clients.
- Implemented clustering & classification models using Python and scikit-learn.

- Automated data reporting processes using Python and SQL, reducing manual work by 70%.

Education

Bachelor's Degree in Information Systems

Universitas Malikussaleh — 2019–2023

GPA: 3.80/4.00

Thesis: Classification and Clustering of Acute Respiratory Infection Data in Bireuen Regency

Certifications

- ETL and Data Pipelines with Shell, Airflow and Kafka – Coursera
- Python Project for Data Engineering – Coursera
- Bootcamp Data Analyst – DQLab
- SAP Analytics Cloud & SAP Build Apps – ASEAN DSE
- Data Science & ML Bootcamp – Dicoding
